Education

Mumbai University **July 2020 - June 2024**

BE Computer Engineering Major in Blockchain(CGPA of 8.07) *Mumbai, India*

Experience

Rheolly (prev. Unwallet) **Remote**

Co-Founder *Jul 2025 – Dec 2025*

- Led early **customer discovery, technical scoping, and pilot deployments** for an **agent-first wallet and payments infrastructure**.
- Worked closely with engineers and design partners to define **agentic payment workflows, account abstraction patterns, and failure handling** for real-world usage.
- Drove end-to-end onboarding of early customers (**ZyfAI, Vistara Labs, bond.credit, gigabrain.gg**), from **integration design** to production pilots.
- Collaborated with ecosystem stakeholders (**Ethereum Foundation, Coinbase, MetaMask**) on **agentic payments, smart accounts, and infra design trade-offs**.
- Acted as a bridge between **users, engineers, and partners**, translating customer needs into deployable system requirements.

Attenomics **Remote**

Co-Founder and COO *Jan 2025 – Jun 2025*

- Owned **end-to-end delivery** of Attenomics v0, a **verifiable attention layer** for tokenized social engagement, from concept to live beta.
- Worked directly with early users to **design data pipelines, verification logic, and UX flows** for onchain attention tracking.
- Embedded with **100+ testers** to collect feedback, debug edge cases, and iterate on system behavior under real usage.
- Scaled the product from **0 to 500+ users** and closed the **first paying customer** by shipping usable, reliable workflows rather than demos.
- Learned firsthand how **model behavior, incentives, and abstraction choices** impact user trust and adoption in production systems.

Qoneqt **Mumbai, India**

DevRel and Ecosystem *Nov 2023 – Dec 2024*

- Worked closely with **engineering and design teams** to refine **onboarding flows and tooling integrations** (**Huddle01, video infra, wallet UX**).
- Identified recurring **developer pain points** and fed insights back into **product**, streamlining adoption.
- Led **partnerships** with top Web3 protocols including **Huddle01, Sandbox, QuillAudits, Okto Wallet, Router Protocol**, and others, expanding ecosystem presence.
- Hosted **30+ workshops in 10+ cities**, onboarding **2000+ developers** into the Qoneqt ecosystem.
- Managed **community channels, user interactions, and support flows**, strengthening retention and feedback loops.

The Graph **Remote**

Developer Advocate *Jan 2023 – Mar 2024*

- Co-authored **guides and onboarding docs** for subgraphs and smart contracts, simplifying adoption.
- Engaged directly with **builders**, resolving **tooling/debugging issues** and improving dev experience.
- Conducted **6 workshops**, educating **1000+ learners** on subgraphs and Ethereum smart contracts.

Projects

Proof of Med (Winner, DeSci) | *ZKPs, Noir, Sindri, zkVerify, Next.js* | Demo **Feb 2025**

- Built a privacy-preserving prescription verifier using **Zero-Knowledge Proofs**, deployed on **Arbitrum One Testnet**.
- Designed ZK circuits in **Noir** and integrated scalable proof verification via **zkVerify**.

Encryptix (Winner, ETHGlobal Bangkok) | *FHE, Inco, Hyperlane, Base* | Demo **Nov 2024**

- Developed world's first on-chain **ticketing platform** with **private + transparent** ticket data handling.
- Used **FHE on Inco Network** for privacy, with cross-chain communication via **Hyperlane**.

OwnSound (Winner, Hacker House Goa) | *AES, IPFS, Inco FHE, Polygon* | Demo **Aug 2024**

- Created a Web3 platform for **Non-Fungible Sounds (NFS)**, enabling fair music ownership and royalties.
- Implemented **AES + IPFS** for storage, and **Polygon smart contracts** for transparent royalty splits.
